Course Coordinator, Contact Details	Prof. Volodymyr Sobolev e-mail: <a href="mailto:vsobolev@karazin.ua">vsobolev@karazin.ua</a>
Prerequisites	Economic Theory, Economics, History of Economics and Economic Thought. Microeconomics, Macroeconomics, International Economics,
Objective	<p>The purpose of teaching the academic discipline is to form a systemic quality of economic knowledge based on increasing the level of various existing (both simultaneously and sequentially in time) types of economic systems and analyzing the similarities and differences between them.</p> <p>Comparativism, together with evolutionary political economy, takes the understanding of the economic structure of society beyond the abstract model of a market economy, studying the actual relationship between various types of market and non-market economies that exist (or have existed) in the world. Such analysis leads to an understanding of various economic systems as specific stages of development of the economic type of social relations.</p>
Learning outcomes	<p>-PLO01. Have advanced conceptual and methodological knowledge in economics, management of socio-economic systems and at the border of subject areas, as well as research skills sufficient to conduct fundamental and applied research at the level of world achievements in the relevant field.</p> <p>-PLO02. Deeply understand the basic (fundamental) principles and methods of economic sciences, as well as the methodology of scientific research, create new knowledge in the field of economics in order to achieve economic and social development in the context of globalization.</p>
Methods of control and assessment	<p>Current and final (semester) control. Current control is carried out in seminar classes during the performance of test tasks, homework, checking the solution of cases; checking the solution of atypical tasks on the use of knowledge in practical situations; independent and control work.</p> <p>Semester final control is carried out in the form of a written exam.</p>
