**CATALOGUE OF ELECTIVE EDUCATIONAL COMPONENTS  
FOR THIRD-LEVEL STUDENTS  
FOR THE EDUCATIONAL AND SCIENTIFIC PROGRAM "ECONOMICS",  
Specialty C1 "Economics and International Economic Relations"  
(ENTRY 2025)**

**APPROVED:**  
By the Scientific and Methodological Commission  
of the Faculty of Economics 10.04.2025

Dear applicants!

To form an individual educational trajectory, you have the opportunity to choose certain selective educational components (EC).

According to the Law of Ukraine "On Higher Education", the volume of selective educational disciplines is not less than 25% of the total number of ECTS credits provided for this level of education.

Third-level (PhD) applicants can also choose academic disciplines offered for the first (bachelor's) and second (master's) levels of higher education.

Applicants select elective components from the catalog by filling out the appropriate questionnaire.

For each elective component from the catalog, a work program and/or annotated discipline has been formed, which indicates the learning outcomes, goal, and brief description of the discipline.

Below is information on the scope and list of elective educational components offered for selection to applicants who will study on the program during the 2025-2029 academic years.

Applicants must choose any 5 components from the proposed list.

**Catalog of elective subjects  
for postgraduate students of the 2025 intake  
(taught in the 2nd year in the 2026-2026 academic year)**
